

1. Driver positions *SUPER-BURRO* so that push arm on base touches edge of skip. As fork truck is driven forwards, mechanism unlocks, releasing hinged base.

2. Driver then lifts the forks, allowing *SUPER-BURRO* base to open further. Contents are discharged in a controlled manner.

3. Driver can safely lift the *SUPER-BURRO* to allow full emptying.

4. *SUPER-BURRO* is moved away from the skip and lowered to ground level where the base closes and locks automatically. There are no chains or fixings to remove.

Fed up with fiddly fork attachments?
Up to your waist in **WASTE?**
You want **CONTROL?**
You want **SAFETY?**
You need **SUPER-BURRO™**
THE
WASTE HANDLING

SUPER-BURRO™

Patent number: 2321451

Make your life easier with the MGK range of *SUPER-BURRO™* self-dumping containers. Ensure a safer waste handling process for your business now.

Demonstrations are available on request. Please contact us on the number below to see the benefits for your business.

- ▶ Efficient
- ▶ Productive
- ▶ Safe
- ▶ Durable
- ▶ Easy to use
- ▶ Cost effective
- ▶ 6 standard sizes available
- ▶ *SUPER-BURRO™* can be custom-built to your specification if required
- ▶ Optional colours

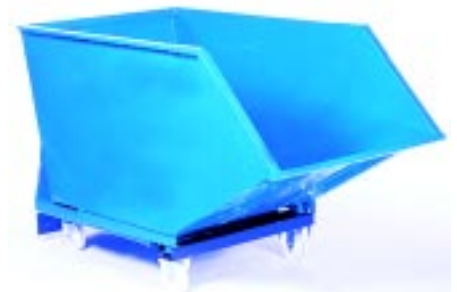

▶ *SUPER-BURRO™* self-dumping containers built to your specification if required. Our Monster *SUPER-BURRO™* was designed for one of our clients who had large bulky items for collection and disposal.

▶ *SUPER-BURRO™* is available in optional colours for hazardous materials. Ensure safe handling of dangerous materials around the workplace. Reduce the risk of occupational injury. This unit is fitted with a sump to collect fluids which can later be reclaimed and recycled or disposed of thoughtfully.

▶ Heat resistant *SUPER-BURRO™*. Our client wanted to use this unit to collect hot embers from a furnace. The low overall height makes this unit easy to fit under machines cutting machines e.g guillotines & lathes

▶ Self tipping skips and roll forward skips also available, for latest details see website.
